

I have a hard time understanding why the FCC would approve something that will almost destroy the operations of the oldest mode of communication in time of distress, as this BPL (Pollution) interference . Hams have always been there to help everyone else, NOT cause destruction to anyone else. Why are you agreeing to this destruction of the Amature Radio operation with this interference?? Who will benefit from this, NOT the people in time of distress, when communications is so important and the Ham is always ready and willing to assist the Emergency groups. Why are you going to destroy an age old hobby for some many people, young and old, male and female? I would request you to think about what you are destroying for so many so Big Business can take advantage of the people. Thank you for allowing me to express my concerns. K4NWW Fred Crowson a ham since 1959.
